PAS Update

Fall 2001

TIW releases their own accounting system ALERE.

TIW, which has a manufacturing system that links to ACCPAC Source products, has now released their own accounting system ALERE. It is written in Microsoft Visual FoxPro 6 and uses MDI (Multiple Document Interface) and SPI (Single Point Information).

It retails for \$1,995 a module/5 user and is modifiable through a Dealer Kit. Available modules are: Sales, Manager, Purchases, Inventory and General Ledger.

This is in addition to the manufacturing modules: Workshop, Sales Order Configurator, Bill of Materials and Planning.

Pro Series receives a "Four-Star" rating from CPA Software Review

ACCPAC®

ACCPAC Pro Series version 6.0 scored at the top of its class in a November 2000 ranking from *CPA Software News*, receiving a four-star rating (out of a possible five).

Specific comments from the publication's editorial board included the following:

- "ACCPAC Pro Series is a serious accounting system for a serious company. It is packed with so many bells and whistles that it would be impossible to learn them all in a short period of time. This system is designed to grow with your needs."
- "I liked the fact that Pro Series allows you to modify the system to your needs, and enhancements are continuously implemented into the entire suite."
- "I would say it is the most advanced Microsoft-based accounting package. Customization is available with the purchase of the source code, which can be modified through Microsoft Visual FoxPro or Microsoft Visual Studio."

ACCPAC Earns Independent Raves

ACCPAC Advantage Series Corporate Edition (formerly ACCPAC for Windows Small Business Series) version 4.2 scored at the top of its class in a November 2000 ranking from *CPA Software News*, receiving a five-star rating (out of a possible five).

Specific comments from the publication's editorial board included the following:

- "The design is both effective and efficient—screens are logical, movement between functions is lightening fast, and flexibility is apparent throughout the modules."
- "The wide array of features make it a strong candidate for use by a variety of small to medium-sized businesses."
- "The functions, features, and flexibility of the system help to set the standards in this market."

In a separate development, the internationally respected Institute of Chartered Accountants in England and Wales (ICAEW) awarded ACCPAC Advantage Series Enterprise Edition (formerly ACCPAC for Windows Corporate Series) the prestigious ICAEW Information Technology Products accreditation for accounting applications. The Institute's evaluation and accreditation took only five days—the fastest for any product ever.

IdCAEW commended ACCPAC Advantage Series Enterprise Edition for its superior architecture, which enables easy separation of its interface, business logic and database; superior reporting capabilities; ease of customization; and ability to integrate easily with Web applications.

First in Accounting Software Survey, by K2 Enterprises.

March 1, 2001 - K2 Enterprises announced today that the results of the first annual Accounting Software Survey shows BusinessVision 32 as the leader in the Beginning Mid Market category.

The objective of the survey was to determine the level of satisfaction that consultants/accountants have with the accounting software programs that are in wide use today.

The survey was conducted between January 2 and February 28, 2001. 1,814 individual firms participated and a total of 2,449 responses were received by the cut-off date. Responses were received from every state and 16 foreign countries including Mexico, Argentina, Canada, Lagos, England, and Russia to name a select few. Many accountants/consultants support more than one system and multiple responses were allowed. While the results of the survey are not statistically valid and do not attempt to define the actual market share of each vendor, they do reflect the

opinions of a significant cross section of the US accounting and consulting community who sell, install and support accounting software.

118 accounting software programs received at least one rating. In order to be included in the final report, an accounting product had to receive at least 25 ratings. 32 programs made the cut.

The survey was divided into four sections. The first section asked for information about the responding firm. The second section rated the accounting software on ten different factors, including Stability, Performance, Flexibility, Ease of Use, Feature Set, Reporting, Integration with Microsoft Office, E-Commerce, Third Party Software, and Technical Support. The third section rated the accounting software by module. The fourth section provided each respondent with an opportunity to make general comments about the accounting software products they were rating.
